Notes to Unaudited Interim Condensed Consolidated Financial Statements (Unaudited)

(all amounts expressed in US dollars unless otherwise indicated)

Three and Nine Months Ended September 30, 2020 and 2019

1. Reporting Entity and Description of Business

Hunter Technology Corp., (formerly Hunter Oil Corp.), (the “Company”) is incorporated in British Columbia, Canada and historically was engaged in the business of acquiring and developing crude oil and natural gas properties. On August 31, 2018, the Company disposed all of its operations in oil and gas production (Note 11). The Company’s primary operations are now technology focused, developing a physical oil trading platform powered by a proprietary blockchain to enable independent crude oil producers to access a global market. (See – Note 16 – Subsequent Events)

Common shares of the Company are listed on the TSX Venture Exchange (“TSX-V”) under the symbol “HOC”, quoted on the OTC Markets Group (“OTCQB”) under the symbol “HOILF”, and quoted on the Frankfurt Stock Exchange under the symbol “RWPM”. The Company’s head office and registered and records office is located at Suite 1615, 200 Burrard Street, Vancouver, British Columbia, V6C 3L6 Canada.

2. Liquidity and Continuance of Operations

These unaudited interim consolidated financial statements are prepared on the basis that the Company will continue to operate as a going concern, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the twelve-month period following the date of these consolidated financial statements. The Company has working capital of \$553,797 as at September 30, 2020.

The business of the Company involves a high degree of risk and there is no assurance that the Company will generate sufficient revenues to cover operating costs. Additional funds may be required to enable the Company to pursue such an initiative and the Company may be unable to obtain such financing on terms which are satisfactory to it. Furthermore, there is no assurance that the business will be profitable. These factors indicate the existence of a material uncertainty that may cast doubt about the Company’s ability to continue as a going concern. These consolidated financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and balance sheet classifications that would be necessary were the going concern assumption deemed to be inappropriate. These adjustments could be material.

3. Basis of Presentation and Summary of Significant Accounting Policies

- a) **Statement of Compliance** - These unaudited interim condensed consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) applicable to the preparation of interim condensed financial statements, including International Accounting Standard 34, “Interim Financial Reporting.” The Company has consistently applied the same accounting policies as those set out in the audited consolidated financial statements for the year ended December 31, 2019, which are available on the Company’s website at www.huntertechnology.com. Certain disclosures included in the notes to the annual consolidated financial statements have been condensed in the following note disclosures or have been disclosed on an

The operating results for interim periods are not necessarily indicative of results that may be expected for any other interim period or for the full year. Accordingly, actual results may differ from these estimates.

(all amounts expressed in US dollars unless otherwise indicated)

Three and Nine Months Ended September 30, 2020 and 2019

13. Fair Value Measurements (Cont'd)

The Company has determined that the carrying value of its short-term financial assets and liabilities (cash and cash equivalents, receivables, accounts payable and accrued liabilities) approximates fair value at the consolidated balance sheet dates due to the short-term maturity of these instruments.

14. Risk Management

The resource industry is highly competitive and, in addition, exposes the Company to a number of risks. Resource exploration and development involves a high degree of risk, which even a combination of experience, knowledge and careful evaluation may not be able to overcome. It is also highly capital intensive and the ability to complete a development project may be dependent on the Company's ability to raise additional capital. In certain cases, this may be achieved only through joint ventures or other relationships, which would reduce the Company's ownership interest in the project. There is no assurance that development operations will prove successful.

Business Risk – The Company is actively developing a new technology trading platform for trading physical oil. There is no guarantee that the Company will be able to identify successfully bring its platform to market or that it will generate significant revenue from market adoption.

Risks Associated with Financial Assets and Liabilities – The Company is exposed to financial risks arising from its financial assets and liabilities. Financial risks include market risks (such as commodity prices, foreign exchange and interest rates), credit risk and liquidity risk. The future cash flows of financial assets or liabilities may fluctuate due to movements in market prices and the exposure to credit and liquidity risks. Disclosures relating to exposure risk are provided in detail as follows:

Credit Risk - Credit risk is the risk of an unexpected loss if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Company's financial instruments exposed to concentrations of credit risk are primarily cash and cash equivalents, including restricted cash, and accounts receivable. The Company has little exposure to credit risk as all of its deposits and related receivable are with major financial institutions or government related receivables.

Liquidity Risk - Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity risk is to ensure, as far as possible, that it will always have sufficient liquidity to meet liabilities when due. At September 30, 2020, the Company had cash of \$668,249, excluding restricted cash of \$25,485. The Company is dependent on raising funds by borrowings, equity issues, or asset sales to finance its ongoing operations, capital expenditures and acquisitions. The contractual maturity of the majority of accounts payable is within three months or less. The Company has historically financed its expenditures and working capital requirements through the sale of common stock or, on occasion, through the issuance of short-term debt.

Foreign Exchange Risk - The Company has exposure to foreign exchange risk in relation to existing commitments or assets denominated in a foreign currency. The Company has chosen not to enter into any foreign exchange contracts since its Canadian dollar working capital balances are not significant to the consolidated entity.
